improvement at heart

Session Description:

By the end of this session, participants will be able to identify the importance of student' data during the internship and after graduation to achieve the university KPIs and assess university success rate from UAE universities perspective. In addition, the session will highlight the needed information for reporting and best practices in collecting, updating and maintaining these data.

Session Goals

- Highlight the importance of employment and internship data
- Identify the challenges in collecting the data
- Share best practices to tackle these challenges

Student Cycle Overview

Why employment and internship data are important?

1. Reporting
2. Accreditation
3. University success
4. Major Justification
5. Marketing

Internship KPIs

Internship Data Challenges

1. Difficulty in collecting student and employer feedback
2. Collate internship data in student information system
3. The gap between student major and employers internship

How to face these challenges?

1. Student feedback is mandatory and part of the portfolio
2. Employer feedback statement per student every week
3. Final employer feedback during the reflection event
4. All data are stored in Banner Advancement

Employment KPIs

Employment Data Challenges

1. Correct Information
2. Up to Date
3. Collate employment data in Student Information System

How to face these challenges?

1. Updates Regularly through Phone calls, emails, SMS, graduates visits
2. All data are stored in Banner Advancement
3. Alumni Survey as part of the clearance process

How to tackle these challenges?

4. Alumni survey after six months of graduation
5. Graduates Destination Survey after 9 months to one and half year of graduation.
6. Longitudinal Graduation destination Survey after 3 years of graduation.
