How to Transform Your Course Evaluation Process to be More Forward Looking

- *Presented by : Long Hua, Zebrey Bedard*

Goals of the presentation

1. Provide an overview of the course evaluation process possibilities
2. Discuss some of the concerns and challenges of the future as the result of compiled use cases by the Blue community
3. Reaffirm eXplorance's pledge to walk in step with the Blue community helping it achieve its next level, whatever it may be

Evolution of Course Evaluations

First Generation – Layered Survey

- ✓ Questions and answers
- ✓ Multiple Subjects in one process
- ✗ No course characteristics (e.g., department name) in analysis
- ✗ No dedicated course and teacher questions (team-taught courses)
- ✗ No student demographics

Second Generation – Array

- ✓ Course characteristics included in the analysis
- ✓ Dedicated course and teacher questions (team-taught courses)
- ✓ Student demographics included in the analysis (e.g., full/part time, gender comparisons)
- ✗ Limit to the number of instruments and relevant analysis for different academic units

3rd Generation...

University ABC

1. This course had high educational impact.
2. I would highly recommend this instructor to other students.
3. What are the strengths of this course?
4. What changes might improve your learning?

School of Arts & Science

1. The lectures, readings, and assignments complemented each other.
2. The instructor grades consistently with the evaluation criteria.
3. The course environment felt like a welcoming place to express my ideas.

Department of Chemistry

1. I find the format of this class (lecture, discussion, experiments, problem-solving) helpful to the way that I learn.
2. The course workload and requirements were appropriate for the course level.

TA

1. The TA knew and was confident in the material related to this course.
2. The TA was available during offices hours or by appointment.

Chemistry labs

1. I felt safe when working in the laboratory.
2. Instructor's comments on my written laboratory reports were helpful to understand the experiment.

Lab Technician

1. I felt comfortable asking my Lab Technician questions.
2. The Lab Technician is flexible and adapts the learning environment when things do not go according to plan.

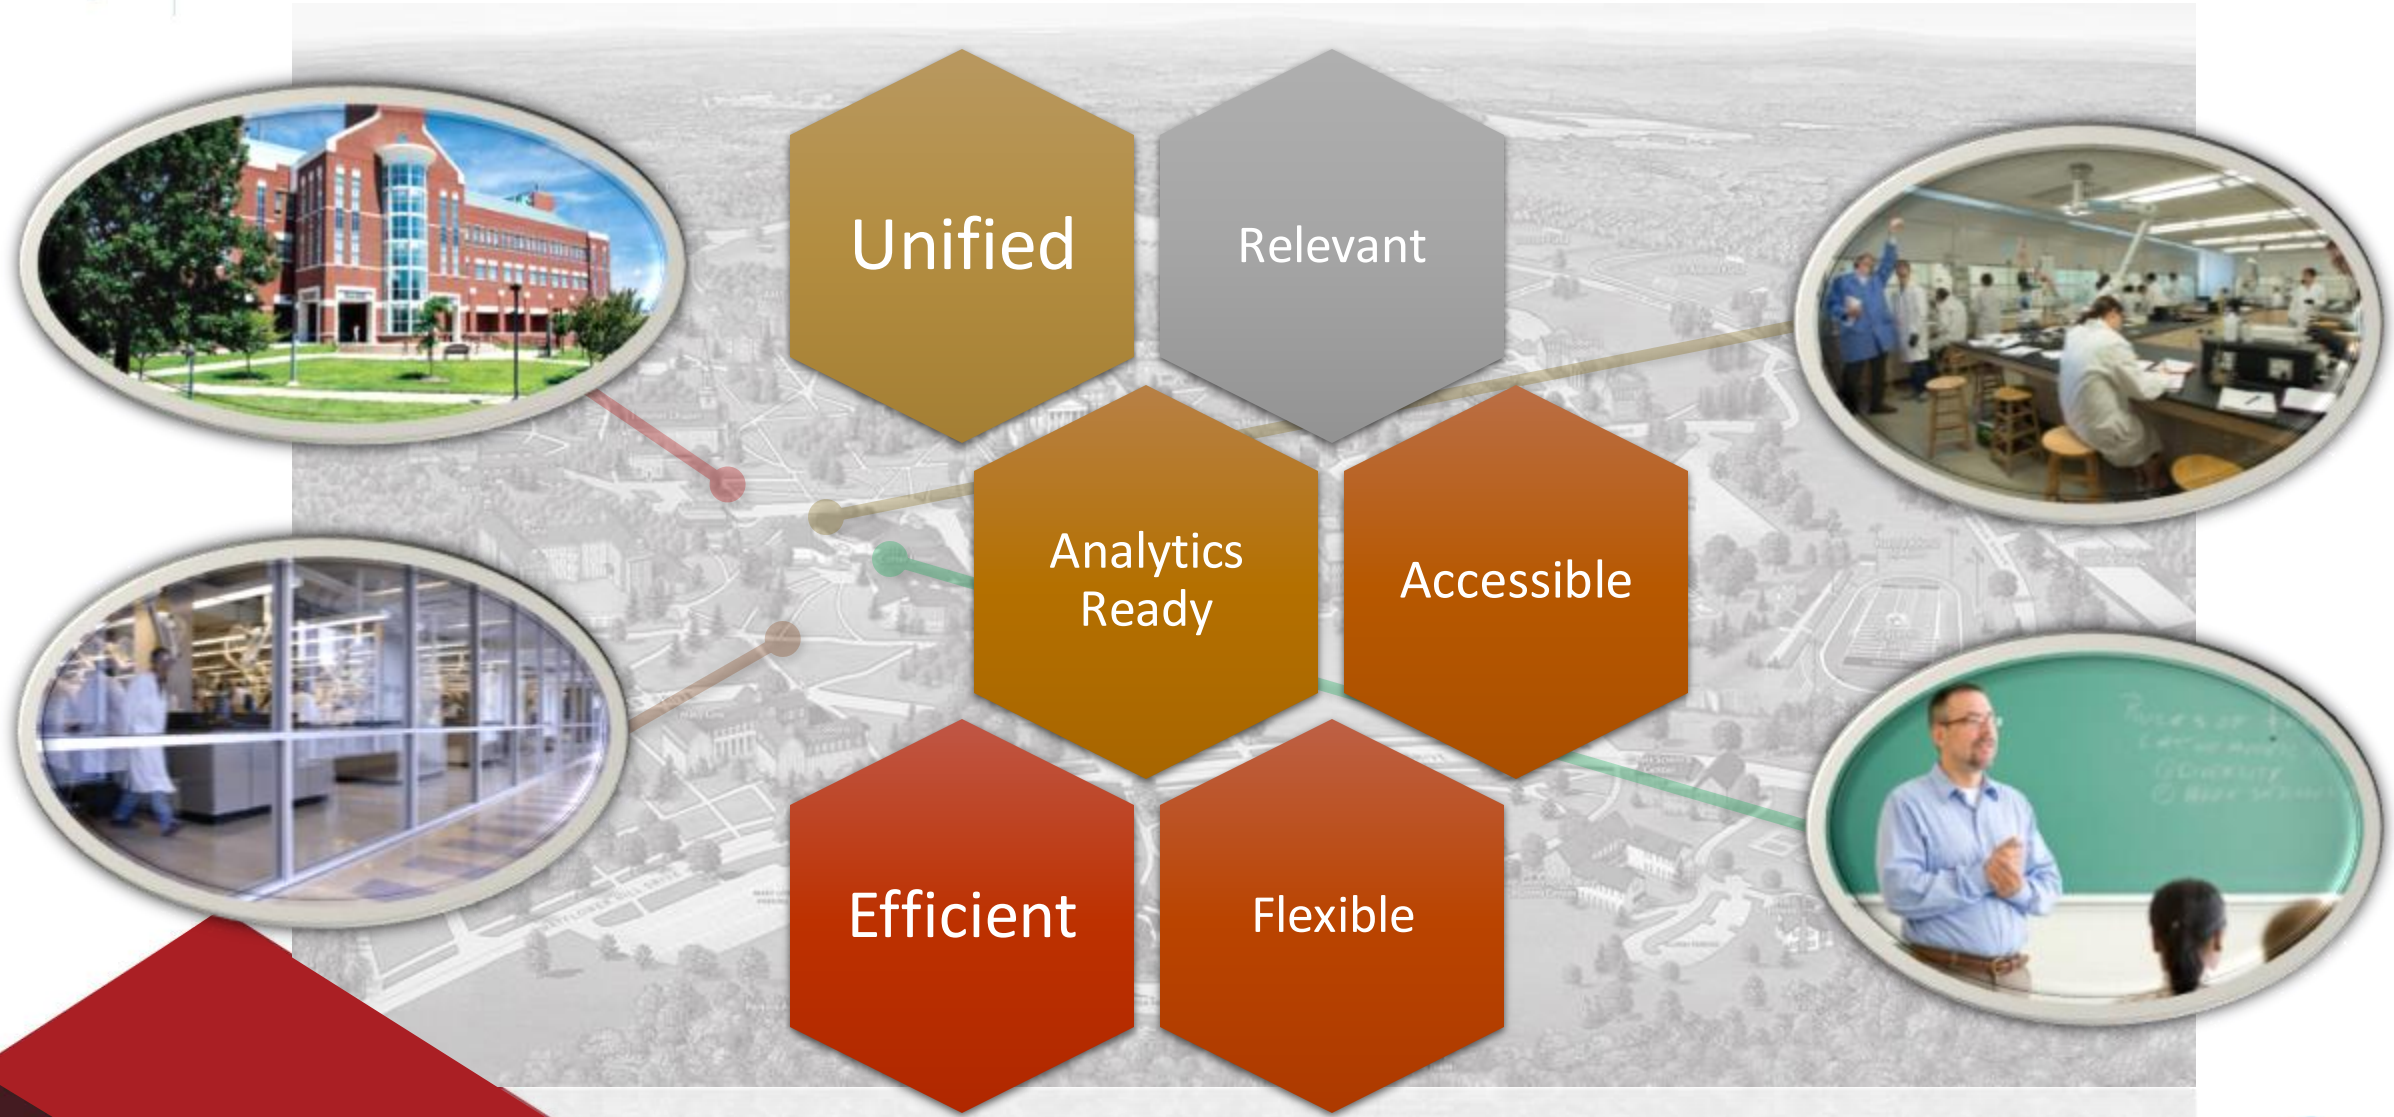

Instructor

1. The lecture's pace was adjusted to the students' level of understanding.
2. What type of information about events and opportunities did you find most useful (disputations, external lectures, etc.) that are relevant to your career path?
