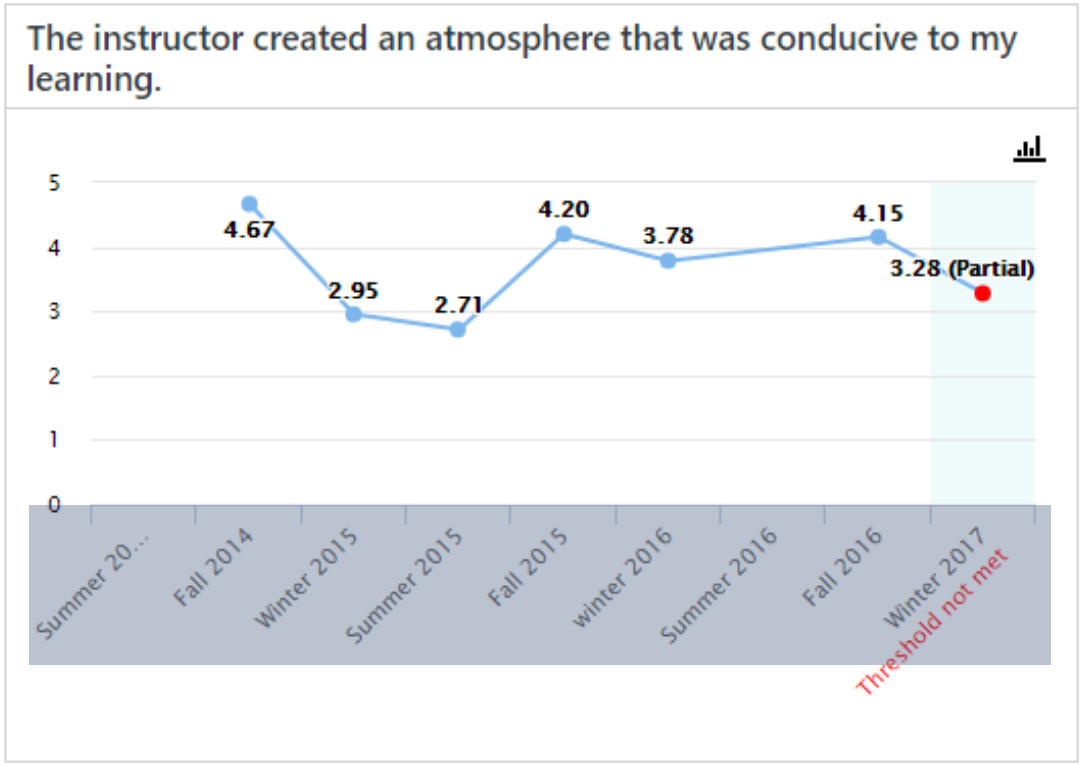
Help Instructors to interpret the data

I received a 3.7 on a question about my speech intonation in Math 101. I would like to know:

- Did I improve from the last time I taught this course?
- How is my communication overall for all my courses?
- How is my speech intonation for all courses in 1 term?
- Also, I have a theory as to why I got this result. How can I verify this theory?

Did I improve since I last taught this course?



How is my Classroom Experience overall for all my courses this term?

Course Evaluation Administrator

- Administrator must accommodate demands for ad hoc analysis requests or backlogs them.
- Administrator must maintain multiple versions of the same report for different departments/units.
- Difficult or impossible the admin to keep up with these demand resulting in the data not being serviced fully and the potential insights not being delivered.
