# Agenda

**Introduction** - Purpose, research questions and variables

**The Context** - Curriculum, Assessment, Students & the impact of COVID-19

**The MAP Test** - Domains & prior research

**Self-efficacy** - Domains, sample items & prior research

**The Learning Ecology** - Domains, sample items & prior research

**Questions & Answers**

# Purpose

## The study:

measure the associations between cycle two **students' self-efficacy** beliefs, perception of the **learning ecology**, and **academic achievement and growth**

## Impact of the COVID 19 pandemic:

swift movement from face-to-face instruction to synchronous, asynchronous online and blended learning

## Modifications:

instruments that measure students' perspectives on the predictor variables

# The Research Variables

DEPENDENT VARIABLES	INDEPENDENT VARIABLES
<b>Achievement &amp; Growth</b> <ul style="list-style-type: none"><li>▪ Math</li><li>▪ Science</li><li>▪ Language</li></ul>	<b>Student's Self Efficacy</b> <ul style="list-style-type: none"><li>▪ Math; Science; Language; IT</li></ul> <b>Learning Ecology</b> <ul style="list-style-type: none"><li>▪ Math; Science; Language; IT</li></ul> <b>Demographic</b> <ul style="list-style-type: none"><li>▪ Grade, SES, . . . etc.</li></ul>

# THE CONTEXT

## DR. JAKE

# Context

- **Schooling in the UAE**
  - K-12 Education
  - Public & Private Schooling
  - Education Reform

# Types of Curricula

# Curriculum Requirements

- National requirements + 4 Arabic Subjects

<https://psp.adek.gov.ae/en/investors>

# Assessment

- ❑ **As per National Curriculum Statutory Requirements**
- ❑ **Guided by UAE Inspection Framework**
- ❑ **MOE Equivalency for Foreign Curriculum Schools**

# Students

Public Schools  
Number

619

Teachers Number -  
Public

21,153

Students Number -  
Public

288,794

Private Schools  
Number

643

Teachers Number -  
Private

50,869

Students Number -  
Private

810,537

# The Impact of COVID-19

- ❑ School Closure to Reopening Procedures/policies
- ❑ Student Registrations
- ❑ Staffing Challenges
  - ❑ Distance learning & Re-entry
- ❑ Resource Priorities

Bluenotes **GLOBAL** 2020  
VIRTUAL EXPERIENCE

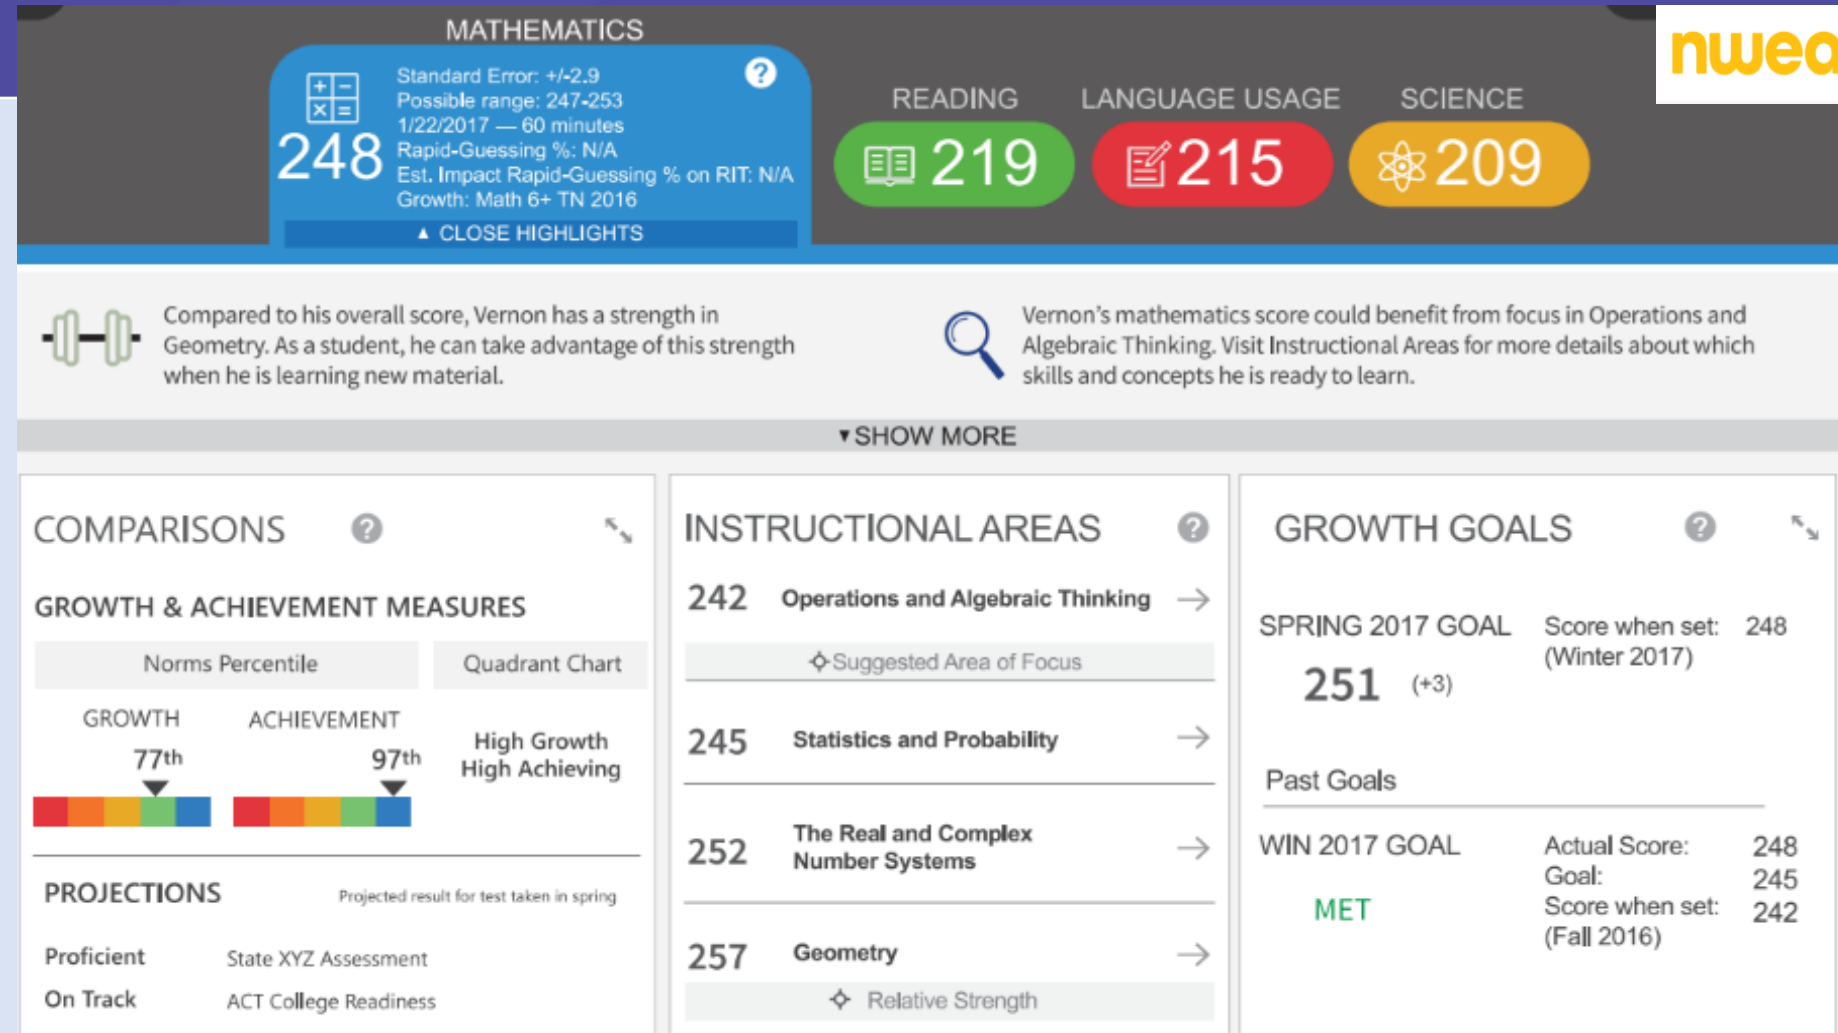

# THE MAP TEST

## DR. JESSICA

# MAP Growth Assessment

- Tracks growth & achievement (K-12)
- Used internationally
- Computer adaptive
- Administered 2-3 times/year
- Strong reliability indices (NWEA, 2011)

# Why use MAP growth assessment

Common measure- all schools following the American curriculum must take it  
**achievement score**                      **growth score**                      **engagement metrics (NWEA, 2017)**

Achievement Status and Growth Report —

Achievement Status				Growth							
Fall 2015		Winter 2016		Student				Comparative			
RIT Range (+/- SEM)	Percentile Range (+/- SE)	RIT Range (+/- SEM)	Percentile Range (+/- SE)	Projected RIT	Projected Growth	Observed Growth	Growth SE	Growth Index	Met Projected Growth	Conditional Growth Index	Conditional Growth Percentile
208-211	67-75	217-220	78-84	215	4	9	4.3	5	Yes	1.0	84
204-207	54-62	212-215	66-73	211	4	8	4.23	4	Yes†	0.8	80
210-213	70-77	214-217	71-78	216	3	4	4.21	1	Yes†	0.2	56

J	K	L	M	N
Test RIT Score	Rapid-Guessing %	Test RIT 10 Point Range	Assessment Name	Mathematics: Geometry
233	11	231-240	MAP: Math 2-5	231-240
229	6	221-230	MAP: Math 2-5	241-250
233	22	231-240	MAP: Math 2-5	251-260

Includes measurement of rapid guessing

# Research with MAP

## Educational studies utilizing MAP achievement and growth data

*Ex. Blended learning (Fazal & Minaz, 2019; Balentyne & Varga, 2017; Koenig, 2018)*

## Minimal research in using MAP achievement and growth data in relation to students' self-efficacy and/or the learning environment

*Ex. Reading (Hager, 2017; Sefkow, 2016)*

# SELF-EFFICACY

## DR. ASLI

# Self-efficacy – Bandura

Self-efficacy is defined as the belief or perception that one is capable of taking the necessary actions to succeed at a given task (Bandura, 1997).

One of the greatest contributor to students' confidence and their ability to achieve in school is their **past performance** (Bandura, 1993).

# Self-efficacy

Scales	Description
1-Mastery Experiences	Having success in mastering a task.
2-Vicarious Experiences	Observing people around us succeed.
3-Social Persuasions	Being influenced by people we admire.
4-Overall Disposition (emotional & psychological states)	Your mental state will influence how you judge your self-efficacy.

# Self-efficacy

Scales	Sample Statements
1-Mastery Experiences	I can learn math topics quickly.
2-Vicarious Experiences	I can apply what I learn from observing others in my science lab class.
3-Social Persuasions	My friends have told me that I am good in reading/writing.
4-Overall Disposition (emotional & psychological states)	I enjoy using computers to do my schoolwork.

# Self-efficacy – Previous Research

**Ketelhut, D. J. (2004) The Impact of Student Self-efficacy on Scientific Inquiry Skills: An Exploratory Investigation in River City, a Multi-user Virtual Environment. Journal of Science Education and Technology, Vol. 16, No. 1, February 2007 ( 2006). DOI: 10.1007/s10956-006-9038-y.**

# THE LEARNING ECOLOGY

## DR. SADIQ

# The Learning Ecology - Sample Items

Scale	Example
<b>1. Personal relevance</b>	What I learn in math is relevant to my daily life.
<b>2. Uncertainty</b>	I learn that there are many ways to solve math problems.
<b>3. Critical voice</b>	I feel safe questioning what or how I am being taught in the math class.
<b>4. Shared control</b>	In math class, I help the teacher to plan what I am going to learn.
<b>5. Student negotiation</b>	In math class, other students may ask me to justify my answers.

# Prior Research on Learning Ecology

## Language

Language learning and teachers' attitudes (Käfer et al., 2018)

Using IT and vocabulary Learning (Huang et al., 2016)

## Math

The instructional quality and students' achievement (Arens, & Möller, 2016)

Classroom environment, math self-efficacy & math performance (Fast et al., 2010)

## Science:

Perceptions of constructivist learning; sophisticated epistemological beliefs; teachers' & students' science self-efficacy; students' achievement in chemistry (Pamuk, Sungur, & Oztekin, 2017)

## Blended Learning

Teacher's engagement and students' perception of e-learning (Kerzic, et al., 2019)

# Summary

The research study investigates the complex interrelationships between cycle two students' academic achievement and growth, demographic variables, learning ecology, and self-efficacy in language, math, science, and virtual learning tools and skills in UAE private schools.

The MAP growth test measures achievement and growth.

Self-report surveys measure self-efficacy, learning ecology and crucial computer skills.

The study will identify the predictors of students' achievement to reinforce students' success and recommend plans for remedial work.
