

Blue Certification Training Programs Overview

	<h3 style="text-align: center;">Blue Administrator Certification (BAC) Training</h3>	<h3 style="text-align: center;">Blue Expert Certification (BEC) Training</h3>	<h3 style="text-align: center;">Blue Report Master Certification (BRMC) Training</h3>
<p>WHO</p> <p>THE TRAINING IS INTENDED FOR</p>	<p>The Blue Administrator Certification (BAC) training is for people who will implement Blue, or be a part of a Blue implementation project, to automate their feedback processes such as course evaluations, institutional surveys, and 360 reviews. They can be any of the following:</p> <ul style="list-style-type: none"> Those who are to implement Blue in their institutions for the first time but have no or little knowledge of Blue yet, Those who have some experience in using Blue, but have not taken any formal Blue training and want to strengthen Blue foundational knowledge, or Those who wish to refresh on the latest version of Blue. <p>Understanding basic database concepts (such as data structure) and program language concepts (such as the concept of variables) is a plus.</p>	<p>The Blue Expert Certification (BEC) training camp is intended for certified Blue Administrators* with experience in implementing a Blue project autonomously at least in one evaluation or survey cycle, or those with an equivalent level of Blue knowledge and experience.</p> <p>*Those who have successfully completed the BAC training and received their Blue Administrators certificate.</p>	<p>The Blue Report Master Certification (BRMC) training camp is intended mainly for:</p> <ul style="list-style-type: none"> Data analysts or research analysts who are responsible for analyzing data collected through Blue to provide reports with the findings and insights, or Blue administrators who are responsible for designing and delivering reports to their institutions. <p>Participants must have a basic knowledge of Blue and have been involved in a Blue project for a minimum of one term. Completion of the Blue Administrator Certification (BAC) training is required prior to attending the BRMC training camp.</p>
<p>WHAT</p> <p>TO EXPECT FROM THE TRAINING CAMP</p>	<p>The Blue Administrator Certification (BAC) training is the foundation of your learning path to becoming proficient with using Blue. In this modularized training program, a training participant will learn the fundamentals of Blue, in order to run a feedback process using Blue. This is the first level of Blue certification for all users who will be implementing Blue for feedback processes in their institutions.</p> <p>Upon successful completion of the BAC training the participant will be awarded the Blue Administrator Certificate and therefore be a certified Blue Administrator.</p>	<p>The Blue Expert Certification (BEC) training is a 3-day instructor-led training camp, designed to further develop your expertise and skills in using advanced Blue features so that you can implement any feedback process at varying degrees of complexity. Becoming a certified Blue Expert requires approximately 40 hours of your time. This Blue Expert Certification training is to be delivered in either an online or traditional in-class format where instructor-led training is combined with pre-training self-directed learning activities.</p> <p>Upon successful completion of the BEC training camp, the participant will be awarded the Blue Expert Certificate and therefore be a certified Blue Expert.</p>	<p>The Blue Report Master Certification (BRMC) training is a 3-day instructor-led training camp, intended to elevate your knowledge and skillset on Blue's report building blocks and functionalities. With enhanced understanding of the reporting functions, you will be able to better analyze the data collected while understanding and visualizing what the data is revealing, in such a way that allows for improved data-driven, well-informed decision making for continuous improvement at your institution.</p> <p>Upon successful completion of the BRMC training camp, the participant will be awarded the Blue Report Master Certificate and therefore be a certified Blue Report Master.</p>
	<p>Delivery Modes:</p> <p>The Blue Administrator Certification (BAC) training is delivered online in two different modes:</p>	<p>Delivery Modes:</p> <p>The Blue Expert Certification (BEC) training camp is designed to be delivered in two different modes:</p>	<p>Delivery Modes:</p> <p>The Blue Report Master Certification (BRMC) training camp is designed to be delivered in two different modes:</p>

<p>WHAT DELIVERY MODES ARE OFFERED</p>	<ul style="list-style-type: none"> • Instructor-led online training • Self-directed online training <p>During the online BAC training subscription period, training subscribers (assigned to the online BAC training seats with their unique login credentials) can take as many online sessions as needed in any of the two delivery modes.</p> <p>Both instructor-led and self-directed trainings are composed of step-by-step demonstrations, training materials, examples and exercises. Upon finishing the certification activity at the end of the training, the participant will receive their Blue Administrator Certificate.</p> <p>A special face-to-face BAC training camp may be offered. Note that online BAC training subscription does not include onsite face-to-face BAC training camps which may require an additional fee.</p>	<ul style="list-style-type: none"> • Instructor-led online training camp • Instructor-led face-to-face training camp <p>Both the online and face-to-face training delivery modes are composed of the following:</p> <p>Self-directed learning module, prior to the instructor-led training:</p> <ul style="list-style-type: none"> • Prior to the instructor-led training camp, training participants are required to view self-directed learning modules which will be made available to you in the Explorance LMS. • This consists of materials that a BEC training participant is expected to review and complete prior to the instructor-led portion of the training. The participant may complete this self-directed module at his or her own pace. This self-directed module is designed to allow the participant to review key Blue concepts that certified Blue Administrators are expected to be familiar with, such as Question Personalization, Subject View Management, and Relational Demographics. • This includes exercises to practice applying these concepts when creating a Blue project. This self-directed module must be completed prior to the instructor-led training camp to ensure that the participant is ready to fully participate in and complete the training. • The instructor will be available to you during this time to assist you to plan and finish the self-directed module before the instructor-led training camp begins. <p>Instructor-led training: This instructor-led training consists of approximately 24 hours of learning activities, including a certification activity. It offers hands-on participation and discussions required to be certified as a Blue Expert. Upon finishing the certification activity at the end of the training, the participant will receive their Blue Expert Certificate.</p>	<ul style="list-style-type: none"> • Instructor-led online training camp • Instructor-led face-to-face training camp <p>Both the online and face-to-face training delivery modes are composed of the following:</p> <p>Self-directed learning module, prior to the instructor-led training:</p> <ul style="list-style-type: none"> • Prior to attending the camp, training participants will be required to view the video: Statistical Analysis & Reporting in Blue, which will be made available to you in the Explorance LMS. An email will be sent to you providing login information to access the BRMC course in the Explorance LMS, and you may complete this step at any point before the camp begins. • The video provides information about some of the key concepts to creating reports in Blue, including the statistics implemented in Blue, when and why they should be used, and how group elements are used in calculating the statistics. This information will provide the foundation for the hands-on exercises that the participants will do together during the camp. <p>Instructor-led training: This instructor-led training consists of approximately 24 hours of learning activities, including a certification activity. It offers hands-on participation and discussions required to be certified as a Blue Report Master. Upon finishing the certification activity at the end of the training, the participant will receive their Blue Report Master Certificate.</p>

Blue Certification Training Programs Overview

	Blue Administrator Certification (BAC) Training	Blue Expert Certification (BEC) Training	Blue Report Master Certification (BRMC) Training
WHAT TOPICS ARE COVERED	<p>The topics covered during the Blue Administrator Certification training for Blue CE, Blue LE, Blue 360, and Blue Sruveys are designed to introduce you to the fundamentals of Blue, by teaching you:</p> <ul style="list-style-type: none"> • Blue terminology, concepts, data preparation, and how to configure a simple questionnaire for a course evaluation process • The core concepts that underpin a feedback process: preparing the data, selecting and configuring the appropriate data structure, and building, launching and managing a feedback process • The different tools to automate a feedback process, including how to import and update data, using the data to control questionnaire behavior and content, and using the data to automate time functions such as course evaluation and report distribution dates • Reporting basics, including creating individual and aggregate reports, and commonly-used report building features and functionalities to build insightful reports visualizing the results of the statistical analyses 	<p>The topics covered during the Blue Expert Certification training are designed to further develop your Blue expertise and skills, by teaching you how to:</p> <ul style="list-style-type: none"> • Implement an advanced level of end-to-end automation of your feedback processes • Merge cross-listed courses to enable unified report building • Implement dynamic report distribution to support your decision makers, as personnel changes • Gain greater autonomy in the use of Blue and its companion modules and products to administer any feedback process • Optimize your Blue implementation to best address your own institution’s needs • Experience how your expert knowledge and skills in using advanced Blue features and functionalities can help your institution and be a sought-after Blue Expert in your institution and by your colleagues 	<p>The topics covered during the Blue Report Master Certification training include, but are not limited to, the following:</p> <ul style="list-style-type: none"> • Blue report blocks and functionalities available to build reports: from basic to advanced • How to build and customize reports that deliver stories with actionable insights at various levels: instructor-level, departmental-level, program-level, etc. • Report administration such as on-going report access management and report delivery management via various channels, to effectively work with Blue Administrators and Blue Experts • Best practice tips for testing and troubleshooting
WHY ATTEND THIS TRAINING CAMP	<p>By attending the Blue Administrator Certification training, a training participant will be able to understand basic Blue functionalities and the fundamental data organization and processes, including:</p> <ul style="list-style-type: none"> • Understand basic Blue functionalities and the fundamental data organization and processes: <ul style="list-style-type: none"> – Working with datasources and Blue’s project definitions. – Creating, publishing, and monitoring a project. 	<p>By attending the Blue Expert Certification training, a training participant will be able to:</p> <ul style="list-style-type: none"> • Acquire expert knowledge and skills in using advanced Blue concepts and functionalities to further automate feedback processes (course evaluations, institutional surveys, and 360 evaluations), end to end, in order to provide a greater level of autonomy to end users and distribute reports with actionable insights to decision-makers • Learn how DST (Data Sync Tool), DIG (Data Integrity Gateway), BPI (Blue Portal Integrator), Blue Connector, and BTA (Blue Text Analytics) can be used with Blue to further realize its value in your environments 	<p>By attending the Blue Report Master Certification training, a training participant will be able to:</p> <ul style="list-style-type: none"> • Deepen their knowledge and understanding of Blue’s report building blocks and functionalities at a mastery level, enabling better analysis and interpretation of the data collected • Apply enhanced Blue reporting skills to various institutional situations, developing more reports with actionable insights for data-driven informed decision making • The ability to apply the skills that a BRMC participant acquires during the certification camp to any situation is particularly important, as
